This is a simple mount for the OV5647 style IR-Cut Cameras that mounts to the Articulating Mount by Sneaks.

It has cutouts for 9mm heatsinks, as seen being used for the Raspberry Pis.

Simply mount the Camera by pushing it into the Top Case and screwing the Bottom Case on with **4x M3x10** hex bolts, as commonly found on the Prusa MK3S.

For any modifications, I have provided the CAD files. You can also optionally contact me if you're not able to do the modifications yourself, I'll be happy to help ^^
